Not sure about Pot Sizes? Here are rough estimates of inches to gallon conversions.

4" pot= pint (0.5 quart), 5-6" pot = quart (0.25 gallon), 7-8" pot= 1 gallon, 8.5" pot = 2 gallon
, 10" pot = 3 gallon
, 12" pot = 5 gallon
, 14" pot= 7 gallon
, 16" pot= 10 gallon
, 18" pot = 15 gallon
, 24" pot = 25 gallon
, 30" pot= 30 gallon

Figure out what the square footage is

Square Footage Calculations Area of a Rectangle: Area =Length x Width Ex. (L=12ft W=10ft, 12x10=120sq ft)
